

Remarks

The specification has been amended to incorporate United States Patent and Trademark Office recommended headings and subheadings, and to correct minor clerical errors and errors of grammatical and numerical usage. The claims have been rewritten in U.S. format, eliminating multiple dependent claims. An Abstract has been added. Several obvious corrections to the Specification are made as in the International Application. No new matter is added.

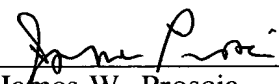

Applicant hereby amends the present application to replace the filed sequence listing with the attached listing which is identical except for the page numbering.

Also provided herein is a copy of the nucleotide sequence in compact recordable form on floppy disc. The computer readable form is identical to the written sequence listing.

Early favorable consideration is thus respectfully requested.

Respectfully submitted,

Tobias Dassler
